# TABLE OF CONTENTS

Dedication........................................................................................................................................viii

Contributors ......................................................................................................................................ix

Foreword...............................................................................................................................................xi

**Eugene P. Sinclair, M.D.**

Preface ..............................................................................................................................................xii

**Chapter One**

In the Beginning: Adolph Frederick Erdmann and the
Long Island Society of Anesthetists.................................................................1

**James C. Erickson, III, M.D., M.Sc.**

**Chapter Two**

The New York Society of Anesthetists: Building the Foundation .........................9

**Douglas R. Bacon, M.D., M.A.**

**Chapter Three**

The Creation of the American Society of Anesthesiologists:
An Intriguing Decade .........................................................................................19

**Douglas R. Bacon, M.D., M.A.**

**Chapter Four**

The Creation of *Anesthesiology* ....................................................................................35

**Douglas R. Bacon, M.D., M.A.**

**Chapter Five**

The Post-World War II Era .................................................................................................43

**Timothy B. Curry, M.D., Ph.D.**

**Ines Berger, M.D.**

**Charles C. Tandy, M.D.**

**Chapter Six**

The Nine Lives of Paul Wood’s Collection:
The Wood Library-Museum of Anesthesiology.........................................................55

**George S. Bause, M.D., M.P.H.**
Chapter Seven
The 1950s: A Decade of Turmoil.................................................................75
Timothy B. Curry, M.D., Ph.D.
Charles C. Tandy, M.D.

Chapter Eight
History of the ASA’s Annual Meeting.........................................................85
Sandra L. Kopp, M.D.
Mark A. Warner, M.D.
Douglas R. Bacon, M.D., M.A.

Chapter Nine
The 1960s: The ASA Comes of Age.............................................................103
Babatunde Ogunnaike, M.D.
Adolph H. Giesecke, M.D.

Chapter Ten
The Anesthesia Survey and the Medical Student Preceptorship ..................123
J. Gordon Morrow, M.D.
John E. Steinhaus, M.D., Ph.D.

Chapter Eleven
The American College of Anesthesiologists:
The Ghost in the Basement.................................................................137
Peter L. McDermott, M.D., Ph.D.

Chapter Twelve
The 1970s: A Decade of Crisis.................................................................147
Alexander W. Gotta, M.D.

Chapter Thirteen
Communication: The ASA Newsletter .......................................................159
Mark J. Lema, M.D., Ph.D.
Erwin Lear, M.D.

Chapter Fourteen
The 1980s: A Decade of Change.................................................................173
Bradley E. Smith, M.D.

Chapter Fifteen
Women Anesthesiologists in the American Society of Anesthesiologists .......193
Selma Harrison Calmes, M.D.
Chapter Sixteen
The 1990s: Growing Pains .......................................................... 205
Glenn W. Johnson

Chapter Seventeen
2000-2005, The ASA at Its Centennial: Success through Innovation.............213
John B. Neeld, Jr., M.D.

Index ................................................................................................. 217
DEDICATION

To all members of the Long Island Society of Anesthetists, the New York Society of Anesthetists, the American Society of Anesthetists, and the American Society of Anesthesiologists who struggled and who continue to persevere in their quest to improve the "art and science" of anesthesiology we dedicate this book.
Douglas R. Bacon, M.D., M.A.
Professor of Anesthesiology and
History of Medicine
Mayo Clinic College of Medicine
Rochester, Minnesota

George S. Bause, M.D., M.P.H.
Honorary Curator
Wood Library-Museum of Anesthesiology
Park Ridge, Illinois

Ines Berger, M.D.
Associate Professor of Anesthesiology
Medical College of Georgia
Augusta, Georgia

Selma Harrison Calmes, M.D.
Professor of Anesthesiology
U.C.L.A. School of Medicine
Oliveview–U.C.L.A. Medical Center
Sylmar, California

Timothy B. Curry, M.D., Ph.D.
Assistant Professor of Anesthesiology
Mayo Clinic College of Medicine
Rochester, Minnesota

James C. Erickson, III, M.D., M.Sc.
Professor of Anesthesiology, Emeritus
Northwestern University Medical School
Chicago, Illinois

Adolph H. Giesecke, M.D.
Emeritus Professor
Former Jenkins Professor
and Chairman
Anesthesiology and
Pain Management
University of Texas
Southwestern Medical Center
Dallas, Texas

Alexander W. Gotta, M.D.
Clinical Professor of Anesthesiology,
Emeritus
University at Brooklyn, SUNY
Brooklyn Medical Center
Brooklyn, New York

Glenn W. Johnson
Executive Director, Emeritus
American Society of Anesthesiologists
Park Ridge, Illinois

Sandra L. Kopp, M.D.
Assistant Professor of Anesthesiology
Mayo Clinic College of Medicine
Rochester, Minnesota

Erwin Lear, M.D.
Professor of Anesthesiology, Emeritus
Albert Einstein College of Medicine
New York, New York

Mark J. Lema, M.D., Ph.D.
Professor and Chair
Department of Anesthesiology
University at Buffalo, SUNY,
Roswell Park Cancer Institute
Buffalo, New York

Peter L. McDermott, M.D., Ph.D.
Lecturer in History
California Lutheran University
Thousand Oaks, California

Kathryn E. McGoldrick, M.D.
Professor and Chair
Department of Anesthesiology
New York Medical College
Valhalla, New York

J. Gordon Morrow, M.D.
Assistant Professor of Anesthesiology
Emory University School of Medicine
Atlanta, Georgia
CONTRIBUTORS

John B. Neeld, Jr., M.D.
Director of Anesthesiology
Northside Hospital Medical Center
Atlanta, Georgia

Babatunde Ogunnaike, M.D.
Assistant Professor
Anesthesiology and Pain Management
University of Texas Southwestern Medical Center
Dallas, Texas

Bradley E. Smith, M.D.
Professor of Anesthesiology, Emeritus
Vanderbilt University School of Medicine
Nashville, Tennessee

John E. Steinhaus, M.D., Ph.D.
Professor and Chair, Emeritus
Department of Anesthesiology
Emory University School of Medicine
Atlanta, Georgia

Charles C. Tandy, M.D.
Clinical Professor
Anesthesiology and Pain Management
University of Texas Southwestern Medical Center
Dallas, Texas

Mark A. Warner, M.D.
Professor and Chair
Department of Anesthesiology
Mayo Clinic College of Medicine
Rochester, Minnesota
FOREWORD

History of the American Society of Anesthesiologists

A benchmark anniversary such as the American Society of Anesthesiologists (ASA) Centennial is an occasion to assess where we have been as individuals and as an organization. The editors of this book have compiled a series of articles to remind us that our profession and the ASA have not always been as we know them. It is only through the dedication and commitment of those who came before us that our specialty enjoys its current stature and respect. During the past century each succeeding generation has built on the achievements of its predecessors to such a remarkable extent that our practices bear little resemblance to those of a generation or two ago.

Today we routinely care for patients who in the past would have been considered unacceptable risks. We guide them safely and comfortably through surgery that would have been unimaginably complex to anesthesiology’s pioneers. I am confident that our current generation will continue to build on past achievements and that future anesthesiologists will regard prospective improvements in patient care with equal admiration.

On behalf of all ASA members it is my privilege to commend the editors and chapter authors for this excellent collection of articles that highlights the multiple areas in which the ASA and our profession have grown and changed.

Eugene P. Sinclair, M.D.
ASA President, 2004-2005
This book chronicles the history of the American Society of Anesthesiologists during the past century. Beginning as a small group interested in overcoming some of the challenges confronting the anesthesia community, the original nine members saw their society grow into a national organization that now boasts more than 40,000 members. Over the 100 years there were countless fascinating stories to be told, of triumphs and tragedies, of good ideas that were brought forth before their time, of conflict, strife, and eventual success. Through the years, however, the recurrent theme is the desire of the physicians of the Long Island Society of Anesthetists, the New York Society of Anesthetists, the American Society of Anesthetists, and the American Society of Anesthesiologists to advance the "art and science" of anesthesiology.

This book has many contributors, and reflects the voice not only of current scholarship in the field of the history of anesthesiology but also of the many members who lived through some of the events described within these pages. As editors, we are thankful for the diligence and dedication of all our authors, some of whom have labored over their manuscripts for the past three years. For several authors, this is their first foray into writing history; it is our hope that they will continue to pursue this new endeavor. Many voices help bring the past forward, blending their cadence to produce the intricate symphony that is anesthesia history. Without their efforts, this book would not have been possible.

We would also like to thank the tireless professionals at the Wood Library-Museum (WLM) of Anesthesiology. Mr. Patrick Sim, the head librarian, remains a constant source of inspiration, kindness, and knowledge. There is no task Patrick will not undertake, no fact that he cannot check, all done with amazing alacrity and good humor. Ms. Karen Bieterman, the assistant librarian, follows closely in Patrick's footsteps. Her attention to detail, expertise, and cheerful attitude have made the task easier for all of our authors. Ms. Judith Robins, the WLM collections supervisor, has helped resurrect and organize many of the papers referred to within these pages. She, too, possesses Patrick's "can do" attitude with an eagerness that makes working with her a rewarding experience. This book is all the richer for the various documents that provide first-hand knowledge of the events of our shared history.

Finally, we would like to thank the officers, Board of Directors, and House of Delegates of the American Society of Anesthesiologists for their support for this book. They have imposed no restrictions upon us, and have encouraged the publication of this book at every turn. To our families and co-workers, who have suffered through the birthing pains of this book, we express our gratitude. Without their love, support, and understanding completion of this volume would not have been possible.

It is our hope that you will enjoy reading this book as much as we have enjoyed creating it. Happy 100th Birthday to the American Society of Anesthesiologists! We sincerely hope another generation will consider our book a resource for beginning their celebration of the 200th anniversary of the ASA!

Douglas R. Bacon, M.D., M.A.
Kathryn E. McGoldrick, M.D.
Mark J. Lema, M.D., Ph.D.
From the transition that began on February 13, 1936, until the final name change on April 12, 1945, the New York Society of Anesthetists transformed itself into the American Society of Anesthesiologists. The society’s outlook changed also, from the greater New York City area to the entire United States, and eventually the world. The issues the society had to grapple with also changed from certification, to how best to represent United States anesthesia to the world. Thrown into the mix was a world war, where the need for physician specialists was acute, and the society’s response would have lasting implications for a decade and a half after the war’s end. This chapter chronicles the coming of age of the American Society of Anesthesiologists, the establishment of the a second specialty-specific journal, the creation of an international public display, and maturation of the leadership to the point where they were able to negotiate with the Armed Forces and strengthen the infrastructure that would lead to the post-war “boom” in anesthesiologists.

FEBRUARY 13, 1936

The business meeting of the New York Society of Anesthetists (NYSA) was tense. Paul Wood (Fig. 1) had placed before the assembled multitude a motion to change the society’s name. In the audience was Adolph Frederick Erdmann, the founder of the Long Island Society. He was unconvinced of the need to change the name, and Erdmann expressed his displeasure for all to hear. It was Wood who calmed him and explained that the name change was necessary to highlight the new nature of the society. Fellowship had made the society national in membership and character. The American Medical Association (AMA) wanted two national societies to sponsor a certification board. The name New York was parochial. To further the specialty board and to place anesthesia on the same footing as all medical specialties, it was necessary to change the society’s name. With this explanation, Erdmann’s opposition dissipated. Wood’s proposal that the name be changed to the
American Society of Anesthetists (ASA) was unanimously adopted. The new name of the society emphasized the split that was occurring in organized anesthesiology. In 1933 Francis Hoeffer McMechan and the Associated Anesthetists of the United States and Canada (AAUSC) were offered a chance to form a section on anesthesia within the AMA and they turned down the request, convinced that the AMA did not favor physician specialists in anesthesiology. McMechan went his own way, creating the International College of Anesthetists, a body whose certifying criteria were weak and whose wings spread all over the world. However, McMechan was criticized by those within organized anesthesiology who felt that all physicians, including those who worked with nurse anesthetists, should be included in any certification process.

Ralph Waters, (Fig. 2) chairman of the first academic anesthesia department at the University of Wisconsin and widely respected within organized anesthesia, led the opposition. He reasoned that physicians such as John Lundy at the Mayo Clinic, who had made tremendous contributions to the field but worked with nurse anesthetists, would be excluded. Waters contended that any certification process without these leaders would lack validity.

McMechan’s response to Waters’ contention was sharp, and chiding. It was unethical, he wrote Waters, for a physician to work with nurses. McMechan further wrote:

“While very few may consider that a basic standard of ethical practice is not necessary, just recently the New York Anesthetists have been appealing to the
