

January 1955

NEWSLETTER 1955

A Merry Christmas to all of you, and an interesting New Year! Again.

Many many thanks for your numerous cards and messages. They were all most welcome, and always will be. There's nothing like Christmas time to get each other up to date (especially change in addresses). Many of you have made important changes in locality or type of practice. Some unavoidably thanks to Uncle Sam, and some by choice with great prospects ahead. We look forward to discharges from the armed services for Fred Hehre, Ed. Hanks, Jack Vanderwood, John Pegg, Max Zung and Bob Epstein. In the academic life, Carter Ballinger has taken on University of Utah, Department of Anesthesiology in which task we wish him great success; Alma Dotto, is working with Bill Howland and Olga Schweizer at Memorial Hospital, New York City; Barbara Lipton with Sol. Hershey at Beth Israel; Dick Patterson is our most adventurous traveller, going with Bob Hiatt and Ethel Silfies to Iran: stopped at Beirut, Lebanon, on the way, where Dick met Veronica Bakamjian. Others have gone into private practice, such as Jake Israel in Syracuse, N. Y. Mickey Belger in Annapolis, Md. George Galos, Zoltan Harris, Victor Zeni. Chris Wolkenstein has joined a group in Winnipeg, headed by my travelling friend, Dona Huggins. Raquel Santos writes of a new Chilean Society; Congratulations!! It's fine banner is glued directly above my desk. The Austrian Congress with Ted Mayrhofer as a moving spirit is progressing well. Don't forget the first International Congress in the Netherlands this coming September. Two interesting visitors to the department this year, Churchill-Davidson from London, and Torsten Gordh from Stockholm. We look forward to hearing Gillies this year.

As for travelling, others have done much more than I, Jack Frumin anectinezed his way down to Mexico City, and there met Bernardo Duran and Homero Trevino, older P. H. associated. My own wandering were quite local this year, had several fine trips such as Oklahoma City, and Gary, Indiana, where Dorothy Darling put on a fine show. To Cincinnati and to Toronto where the Canadians again outdid themselves in hospitality. Manny Papper's trip with his family to the Southwest last spring, ended with a little snip of Julia's lung showing coccidiosis, not Tbc, thank goodness. You just never can tell about the Southwest.

As for local meetings, our annual birthday party outdid all others - never would such talent be suspected amongst our staff in ordinary life. The various district meetings in New York City were well attended but should have been better attended. The 8th postgraduate assembly broke records, as expected. There will be an even better one next year, as well as ASA and AMA meetings in the East next year. Do come.

During the year, I was most happy to meet many of you beyond the metropolitan area, such as Dex Blake, Mildred Bohne, Tom Wickenden who has returned to the anesthetic fold at last. John Code, to whom we extend our deepest sympathy for the loss of his wife in a rail-auto accident recently. Dorothy Darling, Jo DeFrancesco, Lila Gairns, Mary Hall-Shepp, Gloria Hansel Nash, Eva Kavan, Don Richter, Gerry Savage, Al Sorenson (Amigo), Al Wollack, and others whom my swiss-cheese mind has omitted.

2.

Jack Frumin recently had a most interesting exhibit on a device which regulates respiration depending on the patients carbon dioxide output; it won the top medal in the recent NYSSA meeting. Ray Fink, also had an enlightening exhibit on the vocal cords and their action.

I have given up trying to keep up with marriages and divorces, the marriage of Chris Wolkenstein and Margo Richard was most impressive in Montreal, as for babies, I think anesthetists multiply by osmosis or some other means, anyway, application blanks for your offspring for anesthesia residencies are ready any time, such as George Herbert's two adopted children, Don Stein's, Steve Mazur, John Shami, Jack Vanderwood, Lou Carpenter, Marvella Vanney, Marilyn Kritchman, Vance Lauderdale, Bea Gilbert, Max Zung, Shih-Hsun Ngai, George Moonie, Norman Bergman, Rita Foley;

We are having a bang-up time in anesthesia at P. H. these days, 29 eager residents, 20 instructors all researching in their various fields. Monthly research seminars help us keep track of each other. Metabolic and respiratory acidosis. Mechanics of the Larynx, hypothermia, newborn temperatures, pulmonary compliance and resistance are among the subjects being investigated.

The new Ford has properly been dubbed "The Blue Baby" and duly given a score of 8.

Come see us in 1955-Happy New Year to you all,

V.A.

Address List of Former Associates, P. H. Anesthesiology

- Alfonso, Alfredo: Calle-702 Bogota, Columbia, South America
- Belger, Mickey: Anne Arundel General Hospital, Annapolis, Md.
 Bakamjian, Veronica: American Hospital, University of Beirut, Lebanon
